Goods to declare

When you report, it is important that you select the correct "purpose of call". The most common intentions of calls that are related to customs are "Unloading, foreign goods", "Loading foreign goods" and "Taking supplies".

Unloading cargo

If the vessel arrives with cargo that <u>doesn't</u> need customs clearance (only domestic cargo), select **"Unloading, domestic goods"** for "Purpose of call". You click "YES" for reporting to Customs. Then you should not report anything under the tab "Goods to declare". Supporting documents will be added under the "Documentation" tab.

Crew's Effect and Ship Stores will always be reported if you are required to report to the Customs.

If the vessel arrives with cargo that <u>does</u> need customs clearance, select "**Unloading, foreign goods**" for "Purpose of call". You click "YES" for report to Customs. Then you need to report the "total weight of all cargo to unload" under the tab "Goods to declare" and the cargos status, etc. (according to the user guide). Supporting documents will be added under the "Documentation" tab. Crew's Effect and Ship Stores should always be reported if reporting is required Customs.

Loading cargo

If the vessel departs with cargo that <u>dosen't</u> need customs clearance (only domestic cargo), select "Loading, domestic goods" for "Purpose of call". You click "YES" for reporting to Customs. Then you should not report anything under the tab "Goods to declare", supporting documents will be added under the "Documentation" tab. Crew's Effect and Ship Stores should always be reported if reported to the Customs.

Obliged to report to Customs

You are obliged to report to Customs if there are EU goods or non-EU goods on board, if there is ship stores or if the crew has belongings to report. Check the box "Yes" for reporting to Customs, select the purpose of call and report Crew's Effect and Ship Stores.

Regardless of the purpose of call you should always report Crew`s Effect and Ship Stores when you are obliged to report to Customs.

To conclude if you are dispensated from customs reporting, see §§ 20-24 Tullordning (TFS 2000:20).You can read more at <u>Swedish customs</u>. If you are required to report to the Coast Guard, select the option "Yes" for "Obliged to report to Coast Guard".

Which type(s) of advance notification you need to provide depends on the purpose of call, type of vessel, and if there are any special permits or exemptions.

ISPS notification

The rules regarding maritime security aim to protect the maritime sector. The regulations require vessels with gross tonnage over 500 tones that intend to call at a Swedish port to provide information pertaining to maritime security.

ISPS (International Ship and Port Facility Security Code) contains regulations adopted by IMO, International Maritime Organization. This means that the regulations we apply in Sweden apply to ports all over the world. The aim is to create secure transport between ports for vessels and their crews, passengers and cargo. The Swedish Coast Guard takes care of advance notification clearance in relation to maritime security on behalf of the Swedish Transport Agency.

Schengen

The rules regarding border control are the same for all EU and Schengen countries. The rules are found in EU legislation (Schengen Borders Code). The Code specifies specific provisions for marine traffic including the individuals who work on the vessel or who are passengers.

Vessels that arrive from or that on the way to a foreign location are obligated to submit information on the vessel and the individuals who are on board to the Swedish Coast Guard. Find more information <u>on their website</u>.

Regular shipping service authorisation

EU RSS (regular shipping services) status is dependent on authorisation. All goods aboard an RSS ship must have EU goods status or be the object of a transit procedure. A comparison is usually drawn with a bridge (e.g. the Öresund Bridge).

An RSS ship carrying only EU goods is exempted from reporting to Swedish Customs via MSW Reportal.

If there are **non-EU goods** aboard, these must be the object of a transit procedure as per art. 295 b of Commission Implementing Regulation (EU) 2015/2447.This must be either the normal procedure under the new computerised transit system (NCTS) or a simplified transit procedure such as when using an electronic transport document.

Exemption from reporting to Swedish Customs does not apply to an RSS ship with an ETD issued under § 6, chap. 4 of the Customs Proclamation (tullordningen). In this case, full ship reporting is required in MSW Reportal. RSS may not traffic free zones or make calls outside the EU.

Where there is no obligation to report to Swedish Customs (RSS ship carrying only EU goods and/or carrying non-EU goods that are being transited under the normal procedure, NCTS), complete as follows:

- "Obliged to report to Customs" = No.
- Tick the box "This visit is part of a RSS time table" (no "authorization number" is needed no field is shown).

When you are obliged to report according to The Swedish Transport Agency's regulation, on the Registration of Persons on board Passenger Ships, you have to state that the arriving voyage has been safely completed. To do so, check the box "Arriving voyage safely completed" in the Overview. When the voyage to the next port city has been safely completed, check the box "Departing voyage safely completed". Then Sign/Send your changes in MSW.

When a barge arrives at a Swedish port together with a tug, one ship notification shall be made for the barge and one for the tug. You start by making a notification for the barge and when this is complete, you create a new call for the tug.

When you make the call for the barge, mandatory fields will appear under the name of the barge. In these fields, you fill in the name of the tug to be used in connection with the barge.

Because the barge is the cargo carrier, the reporting is due to Customs regulations. On this call, you must report the cargo and check the box "nothing to declare" for Ship Stores and Crew's Effect. Under the crew tab, you have to manually fill in the number of crew members and the master's name. This refers to the tug and must be done in order for the call to be accepted by the system.

Note that ATA/ATD have to be manually reported for the barge.

Ordering of pilot as well as **a fairway dues declaration** shall be reported on the call for the barge. This way, the invoices will be collected on one and same call. On the call for the barge, you must fill in pilotage status "Mandatory pilotage – Pilotage request, if this is the case.

When using a pilot exemption, enter the Pilot exemption certificate on the call for the tugboat.

Should the call cover more than one barge, they should be reported separately. ATA/ATD is set manually for each barge.

Barges are not obliged to perform reporting formalities to the Swedish Coast Guard, which means that you should tick "No" in that field.

As regards Swedish Customs, tugs are subject to reporting formalities if they carry untaxed provisions (Ship Stores/Crew's Effect) or other untaxed goods. Therefore, a separate ship notification must be made for the tug. In order for tugs to be allowed to load ship stores, there must be a visit-ID. Ship stores cannot be loaded for barges.

Tug – Purpose of call – Cargo operations (Unless other untaxed goods (Ship Stores/Crew's Effect) are reported. If this is the case, enter Unloading/Loading, foreign goods.)

Tugs are always subject to reporting formalities to the Swedish Coast Guard (the one exception being domestic travel, except for change of crew), and therefore a separate ship notification must be made for the tug.

At the call for the tug you do not have to order a pilot, and thus as pilotage status you can put "Non mandatory pilotage – No pilotage request".

NOTE! A call with a barge and a tug, will generate two visit-ID, i.e. two ship notification.

When all the required fields are filled in under the overview, the program automatically save the information and the next part is opened.

Arriving pilotage

You specify whether the arriving pilotage should be reported as "Preliminary" or "Final".

Note that when you submit a final pilotage order, the responsible authority starts to schedule a pilot for you. Therefore, it is important that the data in a final pilotage order are correct.

When you click on "Sign/Send" you will not be able to change any information. If a pilotage has received the status "Final" it is not possible to remove it from MSW. You need to contact the pilotage planning if you still need to remove it.

Specify where to begin the pilotage, example a boarding point.

When you have selected "pilotage from", the Route Information will be shown. If you want to use the recommended start time, click on "Use time". If no route exists in the system, you must select the desired start time for yourself.

Draught and height are linked to the vessel notification. Whether editing is done here or in vessel application, the numbers will be the same.

For arrival to ports with height obstacles, the actual height is mandatory to report!

Once you have submitted your preliminary/final arriving pilotage order it will look like this.

You are expected to make a preliminary order for pilotage 18 hours ahead of the desired pilotage starting time and a definitive pilotage order no later than 5 hours ahead of the desired starting time to avoid order-related fees.

As previously, dedicated deep-sea pilotage orders are to be made to the pilotage centre in Malmö; but to the MSW Reportal should be used in conjunction with port mooring

You will receive a response message from the Swedish Maritime Administration stating that your pilot order is received. The pilotage order will get a specific ID number, so called reference number.

```
2016-11-24 16:40 - Swedish maritime administration - Pilot order received
Your definite arrival pilot order with ID 990162817 is registered.
```

When you have sent your pilotage order as final and it's confirmed by the Maritime Administration, you will get a response message with status confirmed.

Once the pilotage is completed you will receive a link to an invoice copy.

- Message

For cruise traffic this (if possible) should be stated.

Like the earlier system, you can send a message to the pilot planner. Note, however, that the pilot planner currently can't send any message back.

Ordering of tugs

When you have filled in the information about the pilotage you have the option to order tugs. To access this, you need to click on "Advanced".

When you press "Advanced" you have one option called "+Add tug boat".

Here you can search for a tug or add one by free text. You can choose if the tug will be going as an escort and if not ordering tugs you can choose a tractor if that option is available at that port.

Upload the excel file for the entire visit

If you want to use an Excel file to report in MSW Reportal, click on "Upload document for the entire visit", after selecting a file, you get a list of the areas that can be reported through Excel. All boxes are filled in by default, but if you don't want to report under a specific area, just unbox that one. If there are no errors in the uploaded Excel file, the information will be visible and editable under each section.

Crew change should be reported via the Excel file or manually. The field for "Embarkation/Disembarkation in current port" should only be filled when a crew member embarks or disembark in the port of arrival. The port needs to be written in UNLOCODE. If there isn't any embarkation/disembarkation, these fields are left blank.

If you choose to "Upload list" you find Crew's Effects in column J of the tab for the Crew list in the Excel file.

Note! If no effects? You must enter NTD (Nothing to declare).

In the Excel template, you can specify Crew's effect in two ways, either by name of the article or the code for the article. The quantity must be written first, followed by a blank space and then the name or code of the article. Commas are used as separators for reporting of several articles, while the point is used as a decimal point.

Provisions: Provisioning must be notified only when applying for victualling for a specific occasion or at request for victualling. If you have general provisioning authorization this shall be dealt with on the basis of the conditions contained in the authorization and should not be reported in MSW.

Oil damage certificate/Bunker certificate: does not need to be reported. However, it should be presented if the authorities request it for control purposes.

T2L: a commodity customs status is determined by whether it is a union or non - union. A union commodity is to be a product originating in, or imported into, the EU. Under certain circumstances, goods status needs to be verified. A common way to prove union status is through T2L.

NOTE! The following is important to remember when you attach documents.

When you choose to attach the document, it is important that you also perform the step "Upload document". If this step is not performed, the relevant authorities only to get an indication that the document exists and that it will be sent later. To ensure that the right document is attached at the right time, the Customs recommend that you attach documents at the same time as you report other information.

Deletions of document - In this dialog, you can also "Delete" a document. The Swedish Customs saves all documents that have been submitted. If you choose "Remove" the document it will be disabled at the Swedish Customs.

If the Swedish Customs has made a decision on an attached document, the Customs does not allow the attached document to be removed. Any attempt to remove the document after a decision will be rejected with an error message. Should such situation arise, it is important that you have the reference number of the document and the document to restore the information in MSW Reportal.

All cargo at arrival

All cargo at arrival – only when the previous port is outside the EU.

Pre-arrival information regarding goods entering the European Union shall be submitted to the customs office of entry in the first EU country to which the transport arrives. Entry summary declarations must be submitted electronically, through the relevant system of the Customs administration. When the first office of entry in the EU is located in Sweden, a reference to the entry summary declaration should be reported in MSW Reportal. More information can be found at tullverket.se.

You can choose to enter the reference to the entry summary declaration (ENS), either with an MRN number (ENS) or with an Entry key.

When you select "+Report Cargo Declaration", you will see the tab "Cargo to unload" and "Cargo to load" and also "All cargo at arrival" (depending on what you selected for "Purpose of call").

Note that the total weight of all cargo to unload is stated in the "overview".

MRN number:

The reference number (MRN) generated by the Customs administration's system is the reference that you as a user should enter in MSW Reportal to report that the goods have arrived in the Union. References (MRN) should be reported for all arriving cargo and not only for the cargo to be unloaded. Consequently, when the first office of entry in the EU is located in Sweden, you must enter all MRN (ENS) numbers, for all cargo on board the vessel, in the "All cargo at arrival" tab. Enter the MRN in the field "MRN numbers of all cargo at arrival" "+Add new item".

Entry key:

When there are many MRN numbers to be entered, you can instead enter information about the vessel's "entry key". The "entry key" is generated by a number of items. Users need to enter information about receiving EU countries and the estimated arrival date specified in the entry summary declarations (ENS), in the "All cargo at arrival" tab. Enter the EU country in the field "Receiving EU country" and the date in the field "Estimated arrival date".

The vessel changes "route" to Sweden from another EU country:

When the entry summary declaration (ENS) has been submitted in an EU country other than Sweden, information about which EU country has received it together with the estimated arrival date must be provided. Specify the "Receiving EU country" and "Estimated arrival date" in the "All cargo at arrival" tab. You do not need to submit an ENS for goods from Norway, because Norway is part of the EU security zone, through an agreement with the EU. See this link for more information.

If there is an exception to leave a pre-notification, please state this.

NOTE! If you tick the box " Exempt from declaring Entry Summary Declarations (ENS)", all the information put in manually under "All cargo at arrival" will automatically be erased.

Cargo to unload

Presentation notification for goods entering the customs territory of the Union should always be given to the customs authority. The requirement to present goods to customs only applies to goods that are unloaded in Sweden. Please note that you need a specified place where the goods are to be stored. A specified place is an approved place by Swedish Customs, or that an import declaration has been submitted in advance if the goods are to be imported directly.

For permission to unload at arrival and to get the cargo declaration approved all the relevant information about the cargo to be unloaded needs to be in place latest at ATA. You can read more about **Ship's report and customs clearance** of ships <u>here.</u>

For the cargo declaration to be approved, all goods to be unloaded must have been presented to Customs.

For Presentation notification you need to report

- reference to the entry summary declaration (MRN number) for non-Union goods.
- reference to the Proof of Union Status e.g. PoUS MRN för Union goods.

For goods to be unloaded you need to report

- port of loading
- origin of the goods
- weight
- type of goods and commodity code
- If the goods to be unloaded are from EU, you need to provide Proof of Union Status e.g. PoUS MRN.

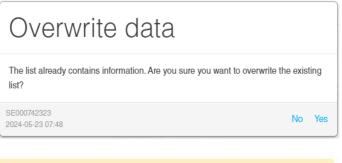

Presentation notification for goods

For **non-Union goods** the presentation notification should refer to the entry summary declaration (ENS). You can read more <u>here</u>. For **Union goods** the presentation notification should refer to the Proof of Union Status). You can read more <u>here</u>.

Report through an Excel template

You can upload the information about presentation notification by uploading an Excel template. To do so choose "Upload list" or drag and drop the file into Goods to declare.

report the value "SUPPORTINGDOCUMENT" as Proof of Union Status. You only need to report it once even if you upload multiple documents.

You also need to upload a goods manifest under the section "Documentation".

Non-Union goods

For **non-Union goods** the presentation notification should refer to the entry summary declaration (ENS).

You can present on master level, when doing this you will present the whole ENS. Enter the ENS MRN and the associated transport document number on master level. No further information is required.

If you have exempt from ENS you only need to provide the Transport document number. Use the exempt from ENS checkbox. If you use the excel to upload the information about presentation notification, enter NOENS in the Excel file instead of the ENS reference

If you wish to present only **parts of an ENS** you can provide information on **house level** or present a specific **container number** or **receptacle**. When presenting container or receptacle you also need to enter the ENS information on Master level.

It is possible to combine the different ways of reporting.

Keep in mind that if you create a row with only ENS at the master level (without container or receptacle), you will present all the goods that the ENS covers.

When you choose to attach the document, it is important that you also perform the step "Upload document". If this step is not performed, the relevant authorities only to get an indication that the document exists and that it will be sent later. To ensure that the right document is attached at the right time, the Customs recommend that you attach documents at the same time as you report other information. Deletions of document - In this dialog, you can also "Delete" a document. The Swedish Customs saves all documents that have been submitted. If you choose "Delete" the document will be disabled at the Swedish Customs.

If the Swedish Customs has made a decision on an attached document, the Customs does not allow the attached document to be removed. Any attempt to remove the document after a decision will be rejected with an error message. Should such situation arise, it is important that you have the reference number of the document and the document to restore the information in MSW Reportal.

Empty containers

Empty containers must be included on a ship's manifest on arrival and departure.

If the ship arrives from a country outside the EU customs security area (which includes all EU member states as well as Norway and Switzerland) an Entry summary declaration (ENS) or an Exit summary declaration (EXS) respectively should be provided when another shipping company's empty container is unloaded or loaded during a transport arrangement.

For the shipping company's own empty containers that are unloaded and loaded respectively, neither an ENS nor an EXS needs to be provided. If this is the case, tick the box "Exempt from declaring Entry Summary Declaration (ENS)" in the "All cargo at arrival" tab, and enter the reason for the exemption in the "Additional information" field.

If the containers are supposed to be loaded with goods and then re-exported, temporary admission with relief from duties will be granted for these empty containers upon arrival.

Dangerous and polluting goods

All ships, irrespective of size and <u>departing from a Swedish port</u> or anchorage with dangerous or polluting goods on board, shall make a Hazmat notification. This notification applies regardless of

whether the ship sails in national or international traffic.

Furthermore, ships, irrespective of size and <u>coming from a port located outside</u> <u>the EU</u> and bound for a Swedish port or anchorage with dangerous or polluting goods on board, shall make a Hazmat notification.

When must the Hazmat notification be submitted?

- When leaving a Swedish port:
 - at the latest at the moment of departure.
- Coming from a port located outside the EU:
 - at the latest upon departure from the loading port outside EU; or
 - as soon as the port of destination or the location of the anchorage

What is considered as dangerous or polluting goods?

The following is categorized as dangerous goods:

Dangerous goods in packaged form (e.g. drums, jerricans, boxes, bags, gas cylinders) loaded in CTUs (e.g. vehicles or containers) in accordance with the International Maritime Dangerous Goods Code (IMDG Code).

Solid dangerous goods loaded directly into a dry cargo ship in accordance with the International Maritime Solid Bulk Cargoes Code (**IMSBC Code**).

Liquid dangerous goods or hazardous chemicals loaded directly into a chemical ship in accordance with the International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (**IBC Code**)).

Liquified dangerous goods or dangerous goods in gaseous form loaded directly into a gas tanker in accordance with the International Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (IGC Code).

Irradiated nuclear fuel, plutonium and high-level radioactive wastes in packaged form loaded into a dry cargo ship in accordance with the International Code for the Safe Carriage of Packaged Irradiated Nuclear Fuel, Plutonium and High-Level Radioactive Wastes on board Ships (INF Code). The following are categorized as polluting goods / substances in accordance with the International Convention for the Prevention of Pollution from Ships, 1973 as modified by the Protocol of 1978 (**MARPOL Convention**):

> Oils in bulk in accordance with **MARPOL Annex I**, loaded directly into an oil tanker.

Noxious liquid substances carried in bulk in accordance with MARPOL Annex II loaded directly into a chemical tanker.

Harmful substances carried in packaged form in accordance with MARPOL Annex III loaded in CTUs (e.g. vehicles or containers).

Bunker reporting is for the time being optional in Sweden. Other requirements may apply in other EU Member States. The information is however important in case of an event leading to possible risk of discharge of polluting products into the sea and therefore the Swedish Transport Agency recommends that bunker is reported by vessels over 1000 GT at departure from a Swedish port (or anchorage) and at arrival from a non-EU port.

Fairway declaration

Vessels with the purpose to load or unload cargo or passengers should report a fairway declaration. To submit a declaration fairway, you must have a credit agreement signed with the Swedish Maritime Administration.

If no goods will be loaded/unloaded and no passengers will disembark/embark you are not obligated to report a fairway declaration for this visit.

If you don't intend to report a fairway declaration, state "No". Then specify the reason for this according to the alternatives in the picture.

Via "Tree structure" you can look for the goods by locating KN2-code and description. You also have the possibility to search for a specific type of goods in cases where you know exactly which KN8 code applies.

Reminder to report fairway declaration

If you haven't reported a fairway declaration, you will receive a reminder in MSW. The fairway declaration will be in the top of the port call-list with an orange background and warning triangle. This will show which port calls you haven't completed a fairway declaration on.

To get rid of the message, you need to fill in the fairway declaration or click on the small box "I decline reporting a fairway declaration" but then a reason has to be filled in.

Choose if you for this visit declines from reporting a fairway declaration. This visit will not be included in the periodic fairway declaration.				
Decline from reporting fairway declaration for visit				

For the vessels that have the right to report periodic fairway declarations, (travels on a fixed timetable, and has received a grant from the Swedish Maritime Administration) it looks a little different in the interface (only the owner/creator of the call can see/do a periodic fairway declaration).

A periodic declaration is specific on:

- Month
- Port city
- Ship
- Organisation

The link is inactivated if:

- 1. visit is not connected to a periodic fairway declaration
- 2. the user declines to report a fairway declaration
- 3. the periodic fairway declaration is connected to another organization
- 4. the visit is shared to another organization and the other organization has created a non-periodic fairway declaration

Press "Go to periodic fairway declaration".

Would you rather create a single declaration for the actual visit, you must remove the periodic fairway declaration? Then press the "Create fairway declaration".

Cruise Route

The Swedish Maritime Administration needs information about a cruise to decide if the fairway declaration should be created and if it is duty-free or not.

If you choose the purpose of call "Cruise, leisur and recreation" or "Cruise, turn around" a new block will be shown.

The Swedish Customs' decision

The Swedish Customs' decisions will come in several rounds. These decisions you will get in MSW Reportal. Below you can find a summary of the decisions that may occur and what is required to get them.

- Arrival at port: To get the arrival to port granted, a prior notification must have been submitted by the deadlines specified. You get an electronic message that the arrival is granted. Once you have received the consent you are free to enter the port.
- **Permission to unload**: When you have arrived at the port, you will receive permission to unload. To receive such permission, you must have lodged Entry Summary Declarations for all goods carried on board. Also you must have an authorised place for handling the goods, or at least one import declaration must be submitted in advance. The permission to unload does not mean that you are allowed to remove the goods from the unloading area, the cargo declaration must be approved first.
- Cargo declaration approved: For the cargo declaration to be approved, all goods must have been presented to Customs. In addition to the ENS mentioned above, you must provide a reference to the subsequent treatment of the goods (e.g. goods location code or customs ID). You must also state the Customs status of all goods, and provide a reference (MRN) for PoUS for any Union goods to be unloaded or prove that the Union goods value has a value of less than 15,000 Euro
- **Provisioning**: If you have applied for victualling you get will get an approval of this in MSW. The same applies if you have requested for victualling from the ship's stores.
- **Permission to depart:** Approval given through MSW and means that the vessel may leave the port.

It is important that you wait for and check the response messages from the Customs. If any information is missing, the Customs can't make a decision and will then send a request for a supplement. You will then have the option to add the missing information.
